I'm a student of the Master Degree in "The Evolution of animal and human behaviour" at the University of Torino, Italy and I'm looking for a research group who is working on African Elephant, because I'd love to have the opportunity to be involved in a field research project (at least three months) on elephants. I would use this work for my master thesis.

My university doesn't pretend propriety over the data collected and I am very available to share the data collected.
